MTRX2700 Group 5:

Meeting 1 (28/3/24)

Attendants

Yunkan Luo (YL)
Luke Marinaki (LM)

Apologies

Absent

Matthew Ma (MM)

Previous Action Items

Action	Owner	Outcome
N/A		

Agenda
1. Meet each other
2. Review previous assignment and compare how we went
3. Set up new Git
4. Get started on new lab; overall idea of what needs to be done

Minutes
- Agenda 2; LM caught up on changing clock speed function by YL
- Agenda 3; LM made new Git called C_LAB_5_MTRX2700
- Worked on Task 1/2, understanding how the interrupts function and integrating w5 and w6 examples together
- Got a file that repeatedly outputs through USART1, but can be interrupted by a button press, and change LED states
- Confirmed that retransmit over same uart in task 4.

Action Items

Action	Owner

Work on tasks 1 – 3 - **Focus on 1 – 2 (+get UART to transmit via serial port back once received)** - **Then do 3 if others completed**	**ALL**
